- 

**Average Order Value**  
1,054

**Total Revenue**  
1,264,762

**Total Orders**  
1,200

**Total Quantity**  
3,535

### Marketing Channels

### ORDER STATUS

### Revenue Trend

### PAYMENT ANALYSIS

### PRODUCT REVENUE

### Quantity Sold

# Dashboard Overview

## KPIs :

1. **Total Revenue** shows the total sales generated.
2. **Total Orders** indicates the number of transactions completed.
3. **Average Total Quantity Sold** reflects overall product demand.
4. **Order Value** measures the average spending per order.

**Revenue Trend:** This chart tracks revenue across different years and helps identify growth patterns, seasonal fluctuations, and potential declines in sales performance.

**Marketing Channels:** This visualization compares revenue generated through referral sources such as Instagram, Email, Google, Facebook, and Referral traffic, helping identify the most impactful marketing channels.

**Product Revenue :** This chart compares revenue generated by each product category and highlights which products contribute most to overall business revenue.

- 
- 
- ▶ **Payment Analysis** : The Treemap displays the distribution of revenue across different payment methods, helping the business understand how customers prefer to complete purchases.
  - ▶ **Order Status** : This section tracks the number of orders across different statuses such as Delivered, Shipped, Pending, Returned, and Cancelled, providing insight into order processing efficiency.
  - ▶ **Quantity Sold** : This chart shows the total quantity sold for each product category, helping identify the most popular products among customers.

# Key Insights

- Revenue declined from 2023 to 2025.
  - Instagram generated the highest revenue among referral channels.
  - Chairs and Printers were top revenue-generating products.
  - Customers preferred Credit Card and Online payments.
  - Chairs recorded the highest quantity sold.
- 

# Business Recommendations

- Increase investment in Instagram marketing.
- Prioritize inventory for high-performing products.
- Investigate reasons for declining revenue.
- Promote low-performing products.
- Enhance digital payment experience.

# Conclusion

- ▶ This dashboard provides a centralized view of sales performance, customer behavior, and marketing effectiveness within the business. The analysis highlights key revenue drivers, product demand patterns, and customer preferences. The insights generated can support data-driven decision-making and help improve overall business performance. Tableau's interactive visualizations enable users to explore data efficiently and uncover meaningful business trends.
